# DEXSAFE BARRIER SYSTEMS

DexSafe is passionate about helping companies around the globe with their physical safety barrier requirements to ensure everyone goes home safe, every day.

Fletcher Steel

## Great Projects With Great Communication

At DexSafe we're renowned for our high level of communication and the hands-on service we provide.

We always provide as much information and drawings as possible so there is no confusion throughout the complete process.

## One Stop Solution Provider

From hazard identification right through to installation, we have you covered. Our sales consultants are trained in Hazard Identification and can assist you with recommending the most suitable solution based on your particular situation.

## Standard + Custom Solutions

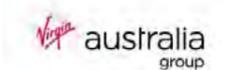

While we have a comprehensive modular barrier range, we can also source other safety products from trusted suppliers worldwide. Custom made solutions are also made possible with our in-house manufacturing facility.

# A COMPREHENSIVE RANGE OF BARRIER SYSTEMS

## BRANDS WE'VE WORKED WITH

A warehouse is a unique environment which combines machinery, people and large amounts of product. This mixture can, at times, create a hazardous work environment. Because of this, warehouses must consider unique safety procedures and guidelines.

- Certified barrier system, designed for warehouses & car parks
- Specifically designed to stop a moving forklift
- Two different finishes - safety yellow or galvanised
- Concrete anchored to ground
- Different heights and configurations available
- All steel construction
- Standard length: 2400mm (custom lengths available)

“The ForkSafe barrier is a quality engineered barrier suitable for factories. The barrier has been designed to provide for ease of installation, safety of pedestrians, and a deterrent for forklifts and other mobile plant inside factories.”

For more barrier configuration options see [pg. 14](#)

## FULLY MODULAR

The ForkSafe barrier system is fully modular, making it suitable for most applications where impact protection is required. Posts are available in 3 different heights, and rails come in a range of standard sizes, but can also be cut to length.

## CZT TECHNOLOGY

The new Crumple Zone Technology sets the ForkSafe barrier system apart. Our unique post is designed to absorb the impact in such a way that reduces the chance of 'shock' to the forklift driver, and also protects your concrete floor from 'blowing out'.

## COMPLIANT SYSTEM

The ForkSafe system is designed to meet and exceed the requirements of relevant AS/NZS standards. For more information around standards and certification, check out our FAQ section on [www.dexsafe.com](http://www.dexsafe.com)

## SINGLE OR LONG RUNS

Whether you need to do short or long runs, the ForkSafe Barrier system is the solution. Modular components make custom and tailored solutions easy.

## INTEGRATABLE DESIGN

The ForkSafe Barrier System can be integrated with our PedSafe barrier system for complete protection.

## REPLACEABLE PARTS

All components of the ForkSafe Barrier System are fully replaceable should any damage occur.

Provides a clear visual barrier between pedestrian walkways and other warehouse traffic. The PedSafe barrier system is fully modular, making it ideal for doing long walkways and also small areas

Unique anti-slip aluminium handrail that can be cut to length. The spring loaded pedestrian gates allow dedicated access points in your system and any number of rails can be bolted to each post.

“The intent behind pedestrian walkways is safety, to keep people walking apart from those in forklift trucks and other vehicles and to reduce the incidence and possibility of accidents in the workplace.”

For more barrier configuration options see [pg. 14](#)

## MODULAR DESIGN

Made from posts and rails, the PedSafe System features clean and smart joins and is easy to customise to any length or configuration.

## SELF-CLOSING GATES

Simple spring loaded gates that automatically close behind you. Key locks are also available and provide an additional method of locking out certain areas.

## SAFETY PROTECTION

Ideal for keeping pedestrians and moving vehicles apart. Dedicated forklift passage ways are easily created and are a good way of ensuring pedestrians are kept out of harm's way.

## SINGLE OR LONG RUNS

Whether you need to do short or long runs, the PedSafe Barrier system is the solution. Modular components make custom and tailored solutions easy.

## MACHINERY ISOLATION

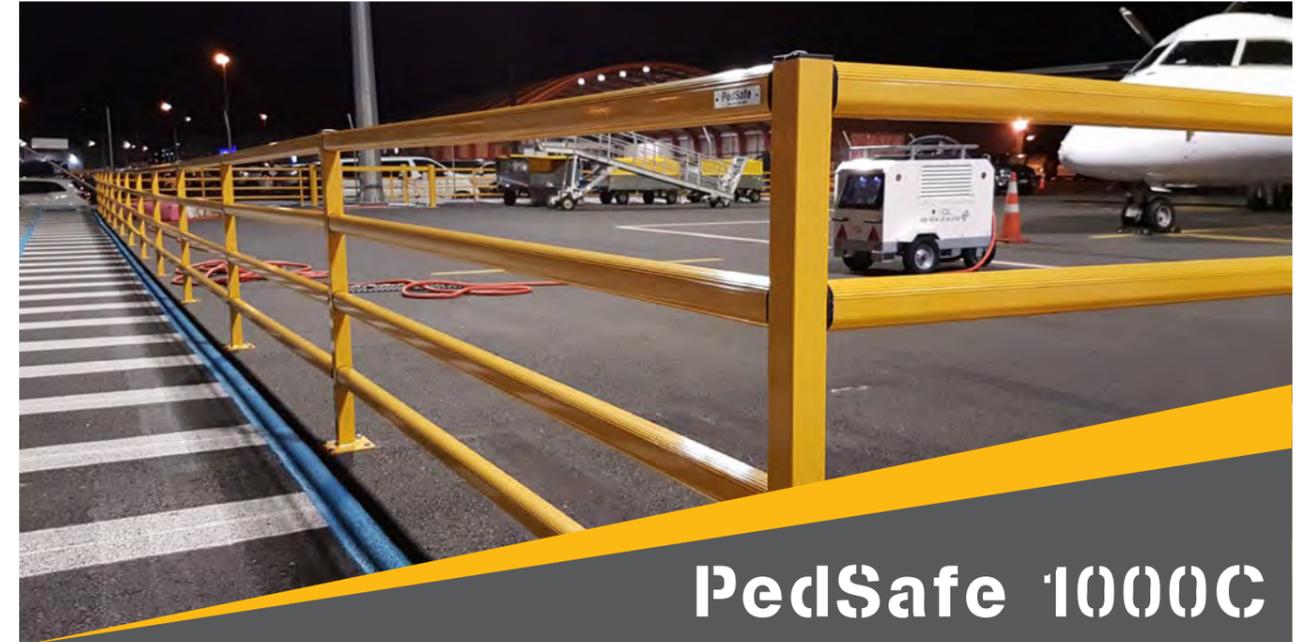

Isolating people from machinery is one of the obvious safety concerns in any factory environment. The PedSafe Barrier System is an economical way to ensure pedestrian are kept out of harm's way.

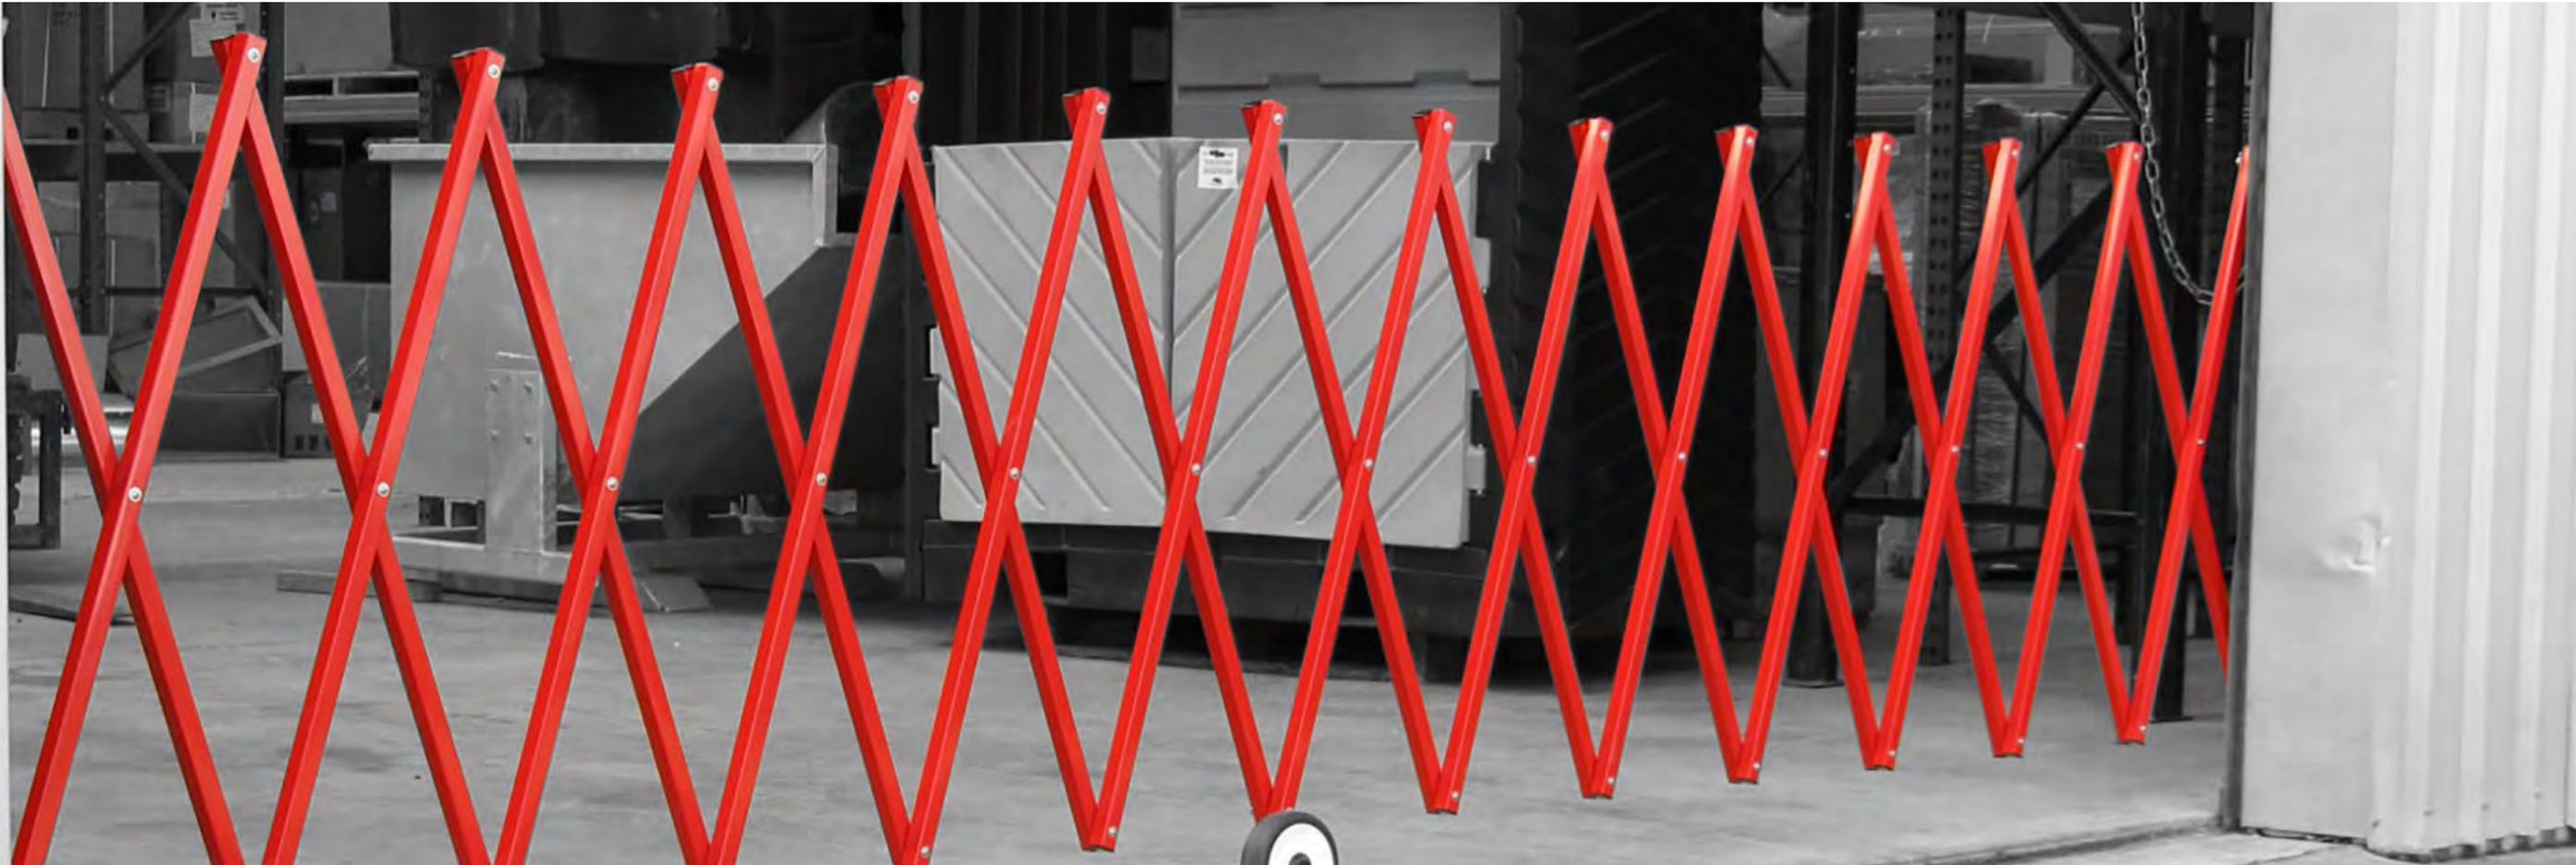

## REPLACEABLE PARTS

All components of the PedSafe Barrier System are fully replaceable should any damage occur.

# PedSafe™

# Pedestrian Walkways + Segregation

A warehouse is a unique environment which combines machinery, people and large amounts of product. This mixture can, at times, create a hazardous work environment. Because of this, businesses must consider measures to ensure all staff & visitors are safe

- Keep unauthorised persons out and stock secured
- Concertina type barrier folds out and latches at one end
- Barrier simply folds back, pivots out of the way when not in use
- Powder coated aluminium construction with riveted joints
- 3 heights available: 1.0m, 1.5m, 2.0m
- Any door width available
- Custom colours available
- Free standing option available

BARRIER HEIGHT			BARRIER LENGTH					BARRIER COLOUR			
1000mm	1500mm	2000mm	2m	3m	4m	5m	6m	Red	Yellow	Black	Blue
			7m	8m	9m	10m		White	Yellow/Black	Red/White	

## VARIETY OF COLOURS

The SpanSafe system can be made in a variety of colours; White, red, blue, yellow, black, silver. We can also do a combination of colours to match your business (Additional costs may apply).

## TOP QUALITY DESIGN

The SpanSafe range of expandable barriers are manufactured to the highest standards. The aluminium bars are acid etched and then powder coated to give them longer life. The rivets are all aluminium and the end poles are stainless steel to prevent corrosion.

## DIFFERENT HEIGHTS

SpanSafe barriers are available in 1000mm, 1500mm and 2000mm heights to suit a variety of applications. The 1m height is usually used for safety situations, while the 1.5m and 2.0m heights are usually used for safety or more security conscious areas.

## LATCHING GATE

The SpanSafe system has been designed for mobility. Concertina type barrier folds out and latches at one end. Barrier simply folds back, and pivots out of the way when not in use.

## EASY TO INSTALL

The SpanSafe expanding barrier has been designed to be easily installed. Poles are simply anchored to the wall with supplied brackets

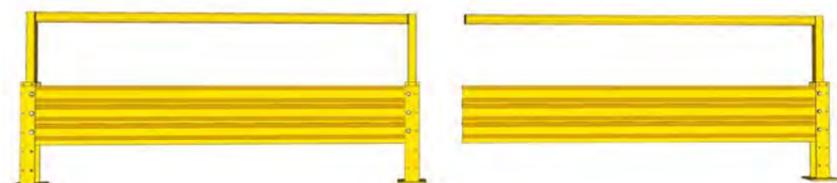

## LOCKABLE LATCH

The SpanSafe latch is designed to accommodate a padlock, which can be used to lock out unauthorised access.

# OUR PROCESS

1

## Hazard Identification

Your journey starts with identifying all the hazards and potential hazards around your workplace. Sometimes this can be a daunting task. DexSafe can offer full site audits and reports, and have also put together an online template toolbox to help guide you through this stage. Go to [www.dexsafe.com/toolbox](http://www.dexsafe.com/toolbox) for more info.

2

## Solution Finding

Once you've identified all your hazards and got a traffic management plan together, DexSafe consultants will take into consideration all aspects including traffic congestion, vehicle weights, speeds and impact angles to recommend the best purpose barrier solution.

3

## Quoting

DexSafe then arranges a quotation for the products based on the final plan and hazard identification report. Your quotation will include everything from supply to installation.

4

## Manufacture

Once you give us the go ahead, if your job is not available ex-stock it will be manufactured to order onsite at our premises. DexSafe designs and manufactures it's own barrier systems in New Zealand.

5

## Installation

DexSafe offers an installation service. Health and Safety during the installation is paramount and our installers are familiar with all Permit To Work and JSA procedures. They work quickly and efficiently to ensure there's minimal disruption to your workplace.

6

## Job Sign-Off

Once our installers have completed the installation we'll give you a call or visit your site if possible to ensure your satisfied with the work completed. We're only satisfied if you are!

# TESTIMONIALS

WHAT OTHERS SAY

“ A great product range & very professional service. Very happy with the way the company was able to change to our requirements at short notice & custom build for us. A very friendly team including the Installation Contractors. A great experience throughout the entire process. Thank you.

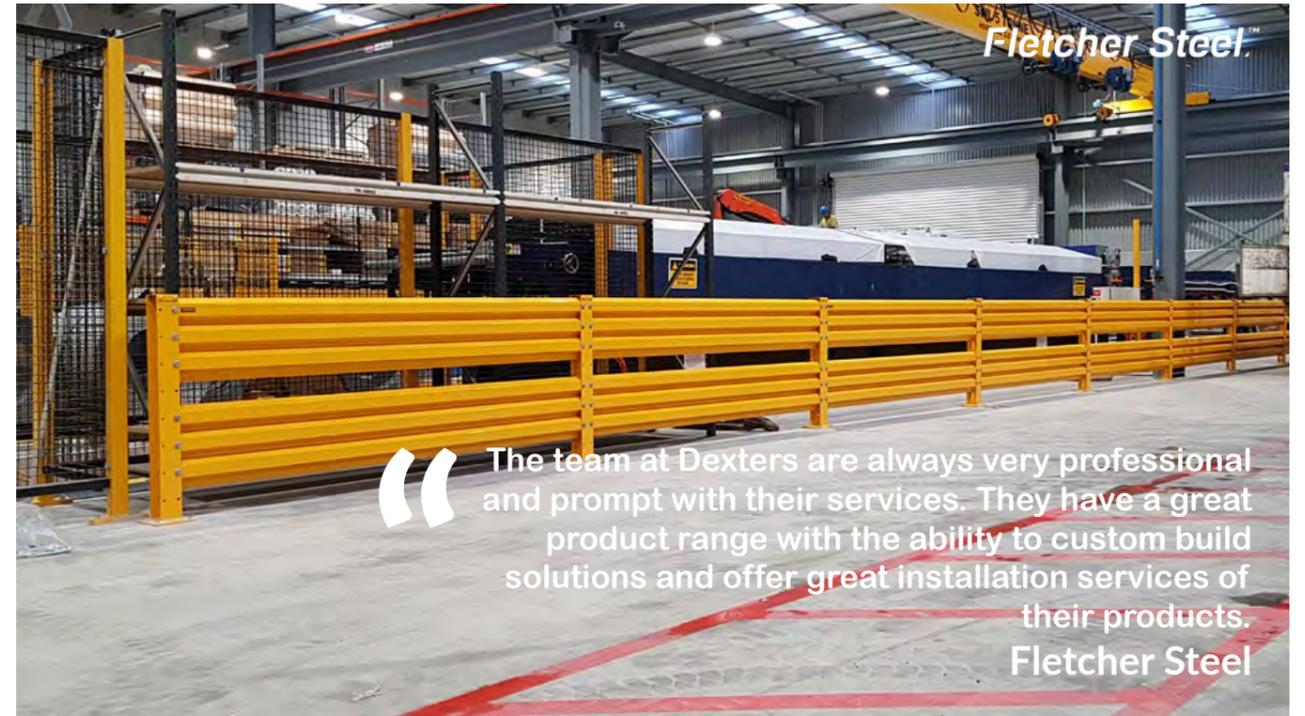

NZ Post International

“ I have nothing but praise for Dexters. Workplace Health and Safety gave us a tight deadline to update the guarding on a couple of machines, Dexters came through for us with their DexSafe products. All the components went together smoothly and WH&S were very impressed with the final product.

Hynds Pipe Systems Ltd

Fletcher Steel™

“ The team at Dexters are always very professional and prompt with their services. They have a great product range with the ability to custom build solutions and offer great installation services of their products. Fletcher Steel

“ Installation was done to a high level of quality with no issue a problem to resolve using a creative & cost effective mindset within this area. On completion an audit was completed with the Project Leader; Dexter's Project Manager, Plant Manager; H&S Manager with a pass in all areas of this installation.

Fonterra

“ I would like to thank you and your team for the hard work getting the barriers installed under extremely tight deadlines. You all performed the work safely and professionally taking into account any disruption to Nestle business and work necessary work going on around you...

Nestle

hello@dexsafe.com

# Hello, to safer workplaces.

## About us

DexSafe is an adviser, manufacturer and supplier of workplace barriers and safety systems that improve the safety and health of people in the workplace. Home Safe, Every Day - that's our passion here at DexSafe. It's why we help companies like yours with their safety barrier solutions.

## Our services

### Proven Processes

We know that implementing workplace changes is demanding. That's why we've got very clear processes right from our initial site survey to the install.

### Professional Advice

Our workplace consultants are trained in Hazard and Risk Management standards so that they can give you up-to-date and best practise advice. We can offer as much or as little help as you need throughout your workplace safety journey.

### Comprehensive Solution

Unique work environment? Difficult traffic and guarding challenges? We know. That's why we've got a comprehensive and modular range of workplace guarding solutions.

### Installation Service

We offer a professional and efficient installation service for all our barrier products. Our onsite project managers are fully trained in Hazard and Risk Management standards, and all our installers are familiar with standard site induction and health and safety procedures.
