WORKPLACE SAFETY

Managing warehouse traffic is an important part of ensuring the workplace is without risks to health and safety.

Vehicles including powered mobile plant moving in and around a workplace, reversing, loading and unloading are frequently linked with death and injuries to workers and members of the public. During the 2010 – 2014 period alone there were 91 fatalities recorded as a result of moving plant in the workplace.

We offer a comprehensive workplace traffic management consulting service to businesses across Australia and New Zealand. Our experienced consultants work with you and your workforce to identify the specific hazards in the workplace.

Hazards may include:

- Interaction between people and moving plant
- Vehicle movements
- Reversing vehicles
- Loading and unloading areas
- Parking arrangements

RISK MANAGEMENT

We will also review the workplace layout, incident and injury rates and traffic movements. Following the identification and assessment of hazards and risks, we will develop a traffic management plan specific to your workplace. Controls may include:

- Barriers, bollards and gates
- Line marking to define access routes and traffic controls
- Reversing vehicles
- Warning lights and audible alarms
- Signage and traffic calming devices
- Administrative controls

INSTRUCTION + TRAINING

Communicating the plan to all stakeholders is critical to ensure the successful implementation of the plan. We will assist with developing:

- Safe work procedures
- Induction material
- Training

PREVIOUS WORK

We have worked with many businesses across Australia and New Zealand to improve workplace safety by developing traffic management plans specific to their workplaces. Our recent projects include:

- Visy Rigid Packaging
- Fisher & Paykel
- Fonterra
- Nestle
- Sealed Air
- Toll
- Amcor

We'd love to discuss how we can help you. Give us a call.

hello@dexsafe.com

Hello, to safer workplaces.

About us

DexSafe is an adviser, manufacturer and supplier of workplace barriers and safety systems that improve the safety and health of people in the workplace. Home Safe, Every Day - that's our passion here at DexSafe. It's why we help companies like yours with their safety barrier solutions.

Our services

Proven Processes

We know that implementing workplace changes is demanding. That's why we've got very clear processes right from our initial site survey to the install.

Professional Advice

Our workplace consultants are trained in Hazard and Risk Management standards so that they can give you up-to-date and best practise advice. We can offer as much or as little help as you need throughout your workplace safety journey.

Comprehensive Solution

Unique work environment? Difficult traffic and guarding challenges? We know. That's why we've got a comprehensive and modular range of workplace guarding solutions.

Installation Service

We offer a professional and efficient installation service for all our barrier products. Our onsite project managers are fully trained in Hazard and Risk Management standards, and all our installers are familiar with standard site induction and health and safety procedures.
